SYZYGY DEUTSCHLAND GMBH   HOREXSTRASSE 28   61352 BAD HOMBURG V.D.H.

Senior Backend Developer TYPO3 (f/m/d)

Location: Bad Homburg / Remote

Full time

Do you see challenging TYPO3 projects, the latest technology and code quality inseparably together?
If you also conjure up creative solutions easily, then you've come to the right place.
Because we are looking for you, a team player who is the link between creation and technology.

the job

- Develop and implement object-oriented, complex and scalable applications based on PHP 7.2+ in the TYPO3 environment
- Advise our project managers as well as our internal and external customers with your technical knowledge
- Plan and create interfaces for connecting external applications
- Together with the team, design optimal solutions for our products (including internal and external extensions) with a view to long-term use
- Work closely with DevOps, Design / UX and Frontend
- Document developed applications and software solutions

what we offer

- Flexible working hours, home office or full remote
- Varied tasks and individual development opportunities
- A motivated team with nice colleagues, flat hierarchies and a pleasant working atmosphere
- Personal responsibility and scope for creativity
- Good accessibility by public transport and car
- Fully equipped kitchen for cooking together
- Capital-forming benefits and subsidy for company pension schemes
- A brand-new office in a prime location in Bad Homburg
- Time for TYPO3 Core contribution (if desired)
- Agile working method based on SCRUM
- 4-eyes principle à la review to ensure quality and the exchange of knowledge
- Automated test and QA pipelines

what you should offer

- Several years of experience in the development of complex web applications with TYPO3
- Very good knowledge of Extbase and TypoScript
- (optimal) experience with Solr in connection with TYPO3
- Knowledge of CI / CD
- Experience in architectural patterns e.g., B. DDD, SOLID, MVC, etc.
- Extensive experience with databases (MySQL, MariaDB, PostgreSQL, etc.)
- Version management (Git) is your daily bread
- Confident use of Docker for local development
- You develop according to test-driven development methods by default
- Code quality is not a foreign word for you and PHPStan and / or Psalm are welcome colleagues

- Confident handling of front-end technologies such as HTML, CSS, JavaScript and the common frameworks
- Enthusiasm for new technologies, participation and further development with the team

So, if your heart beats for the digital

and challenges awaken your ambition, then we look forward to your application.
